La resistencia que la naturaleza ha logrado desarrollar durante milenios, gracias a la tecnología, se consigue en cuestión de horas. Los materiales porcelánicos alcanzan una durabilidad comparable a la de la roca, gracias a la selección precisa de materias primas, el proceso de prensado y los ciclos térmicos a los que se somete. Como resultado final, un diseño refinado que adapta los patrones naturales a miles de gráficos, integrándolos perfectamente en nuestras colecciones de porcelánico.

EN

The resistance that nature has developed over millennia is achieved in just a few hours through technology. Porcelain materials offer the same durability as rock, thanks to the precise selection of raw materials, the pressing process, and the thermal cycles they undergo. The final result is an exquisite design that adapts natural patterns into thousands of graphics, seamlessly integrated into our porcelain collections.

El avance tecnológico y la investigación de nuestro departamento de I+D+i han permitido desarrollar una gama de porcelánicos con espesor reducido a 6.7-6.8 mm, manteniendo sus propiedades esenciales como resistencia, diseño y durabilidad. Esto ha logrado un ahorro del 30% en materias primas y energía, reduciendo las emisiones de CO2. El material es más flexible, facilitando su manejo y colocación, y su menor peso optimiza los costos de transporte. La tecnología de prensado avanzada y las materias primas optimizadas mejoran su resistencia, resultando en un material más compacto, ligero y duradero.
